

CHARADAS COM DESENHOS

22

PRINCÍPIOS DA DESCOBERTA:

- a) Começa-se a decifrar a charada observando os desenhos, da esquerda para a direita
- b) O "desenho" a ser decifrado está representado sob a letra(s) manuscrita(s)
- c) Os números do 1º membro da igualdade representam as letras das palavras representadas no desenho (se for maior que 1) e as escritas sob o desenho (se for 1)
- d) Os números do 2º membro da igualdade, representam os nº de letras das palavras que re-organizam as letras das palavras, que dão a solução da charada
- e) A solução da charada em forma de frase não tem nada a ver com os desenhos.
